## OUR SUPPLIERS

### Vegetarian Express

We're on a mission to fill your plate with plant-based goodness which is better for people, the planet and your business. We believe the future of food lies in a more plant-based diet which uses far fewer natural resources and helps control global warming by creating much less greenhouse gas.

### Masafina

Our range of Mexican products were born in Mexico, inspired by its diverse regions and the countless flavours, dishes, textures and ingredients we encountered on our travels. "Our story is rooted both in the vibrant culture of Mexico city's food, as well as a small kitchen in a west London flat."

ChalkStream®

### Chalkstream® Trout | Fine English Freshwater Trout

The finest English freshwater trout from farmers on the world-famous Test and Itchen rivers in Hampshire. Slow grown for two and a half years in farms built on fast flowing pure chalk stream water, the trout is fresh and lean with a unique clean taste.

### Belazu

We are all about flavour – it is our obsession. Ever since 1991, we have been searching for the best ingredients, always hungry to find what's new and continually striving for the highest quality. We gain integrity from the longstanding relationships we have with our suppliers, growers and employees. The journey matters - it's what we are founded on; our care for people, product and the planet goes beyond the journey from farm to table.
